

EventSphere - Entity Relationship (ER) Diagram

Core database entities, attributes and relationships

User

PK user_id
name
email (unique)
password
role
created_at

Event

PK event_id
FK organizer_id -> User
title
description
location
date
capacity
status

Registration

PK registration_id
FK user_id
FK event_id
status
registered_at

Ticket

PK ticket_id
FK registration_id
qr_code
issued_at

Attendance

PK attendance_id
FK ticket_id
check_in_time

Connection

PK connection_id
FK sender_id -> User
FK receiver_id -> User
status

Message

PK message_id
FK sender_id
FK receiver_id
message
sent_at

Notification

PK notification_id
FK user_id
type
message
is_read

Relationship Mapping (Crow's Foot Summary)

- User (Organizer) 1 ---- N Event
- User M ---- N Event (via Registration)
- Registration 1 ---- 1 Ticket
- Ticket 1 ---- 1 Attendance
- User 1 ---- N Notification
- User 1 ---- N Connection (as Sender)
- User 1 ---- N Connection (as Receiver)
- User 1 ---- N Message (Sender)
- User 1 ---- N Message (Receiver)
